Rezki Boureghdad

CS Teaching Assistant · Software Engineer

PROFILE

Computer-science teaching assistant at Université M'Hamed Bougara since November 2024: tutorials and labs for up to 8 groups of 30–40 students, across 12 subjects. I teach the theory modules students fear most, such as language theory, compilation and programming-language semantics, by building them up from first principles with everyday examples. I'm also a founding member and back-end engineer at Solrus, so my examples come from production systems.

TEACHING EXPERIENCE

Teaching Assistant — Computer Science

Nov 2024 – Present

Université M'Hamed Bougara, Boumerdès · part-time, up to 12 h/week

- Wrote full course chapters for each of the modules I teach (see Subjects taught). Write my groups' assignments and tests, and propose questions for other groups' tests and the final exams.
- Teach tutorials (TD) and labs (TP) for up to 8 groups of 30–40 students (Software Engineering and LMD, Bachelor's and Master's), following the lecturer's syllabus with my own examples and extra exercises. Labs in C++, Python, SQL, Lex and Yacc.
- 70% semester pass rate in my groups (final exam 60% of the grade), up from about 40% usually. Students who had given up on these modules came back to them, and asked me to teach their other modules too.

Development Mentor

Oct 2024 – Sep 2026

DevUp Club, Université M'Hamed Bougara

- Ran a Flutter basics workshop for about 20 participants, and tutored members before tests and exams.

VoidSketches — CS lessons through analogies

Oct 2026 – Present

Own project · voidsketches.vercel.app

- Lessons I write and produce: one concept each, through an everyday analogy, animated and narrated in English and French, starting with compilation.

INDUSTRY EXPERIENCE

Data Specialist, Structure & Architecture

Jun 2025 – Present

Solrus — founding member · software studio, team of 4–8 · Algiers

- Back-end engineering for large B2B platforms (FastAPI, PostgreSQL, Kafka); I review a lot of the team's work through test scenarios.

Freelance Full-Stack Developer

May 2021 – Present

Self-employed (auto-entrepreneur) · contract-based

- 10+ client projects and feature builds (web, mobile, AI), including e-motion, Ahl Quran and 7alkaty.

SUBJECTS TAUGHT

Language theory

Compilation 1 & 2

Programming-language semantics

Algorithms 2 & 3

Databases · SQL 2

Multi-agent systems

Programming (C++, Python)

EDUCATION

MSc Software Eng. & Data Science
Université M'Hamed Bougara, Boumerdès · graduated Jan 2024

BSc Computer Science
Université M'Hamed Bougara, Boumerdès · graduated Jan 2022

RESEARCH INTERESTS

Formal methods (preparing for doctoral entrance exams)

Programming-language semantics

Compilers & formal languages

CERTIFICATIONS

NVIDIA
Fundamentals of Deep Learning · Intro to Machine Learning

Neo4j
Graph Data Science · Fundamentals · Graph Data Modeling

EF SET English
73/100 — C2 Proficient
