Rezki Boureghdad

Computer Science Educator · Software Engineer

PROFILE

Computer-science teaching assistant at Université M'Hamed Bougara since November 2024. I run tutorials and labs across 12 subjects for Bachelor's and Master's students, from first programming courses to compilation and formal semantics. I also work as a software engineer (back-end and data, Solrus), so the examples I bring to class come from production systems. Research interest: formal methods, with a doctoral programme in the field as my next step.

TEACHING EXPERIENCE

Teaching Assistant — Computer Science

Nov 2024 – Present

Université M'Hamed Bougara, Boumerdès · part-time, up to 12 h/week

- Tutorials and labs in 12 subjects for Software Engineering and LMD students, Bachelor's and Master's level.
- Lab and exercise design: hands-on material that connects theory to practice.
- Assessment design: exercises and assessments matched to each group's level.
- Extra support sessions for students who need more time on a topic.

Development Mentor

Oct 2024 – Sep 2026

DevUp Club, Université M'Hamed Bougara

- Designed and ran practical software-engineering workshops. Participants applied the material to their own projects.

VoidSketches — free CS lessons through analogies

Own project

voidsketches.vercel.app

- Course material I write and produce: one concept per lesson, explained with an everyday analogy, animated and narrated in English and French. No account, no paywall.
- First module: compilation, five lessons from "what a compiler actually does" to grammars and automata.

INDUSTRY EXPERIENCE

Data Specialist, Structure & Architecture

Jun 2025 – Present

Solrus — software studio, team of 4–8 · Algiers

- Back-end and data engineering for large B2B platforms: data models, REST APIs, event-driven Python services (FastAPI, PostgreSQL, Kafka, Redis).
- Review much of the team's work by writing and running test scenarios.

Freelance Full-Stack Developer

May 2021 – Present

Self-employed (auto-entrepreneur) · contract-based

- 10+ client projects and feature builds (web, mobile, AI) for businesses and community organisations.

SUBJECTS TAUGHT

Algorithms & Data Structures

Databases

Programming Languages (intro → advanced)

Compilation

Semantics

+ 7 other CS modules (tutorials & labs)

EDUCATION

MSc Software Engineering & Data Science
Université M'Hamed Bougara, Boumerdès · Jan 2024

BSc Computer Science
Université M'Hamed Bougara, Boumerdès · Jan 2022

Next: PhD
Preparing for doctoral entrance exams in formal methods

RESEARCH INTERESTS

Formal methods

Programming-language semantics

Compilers & formal languages

Graph databases

CERTIFICATIONS

NVIDIA
Fundamentals of Deep Learning · Intro to Machine Learning

Neo4j
Graph Data Science · Fundamentals · Graph Data Modeling

EF SET English
73/100 — C2 Proficient

LANGUAGES
